# Abingdon™

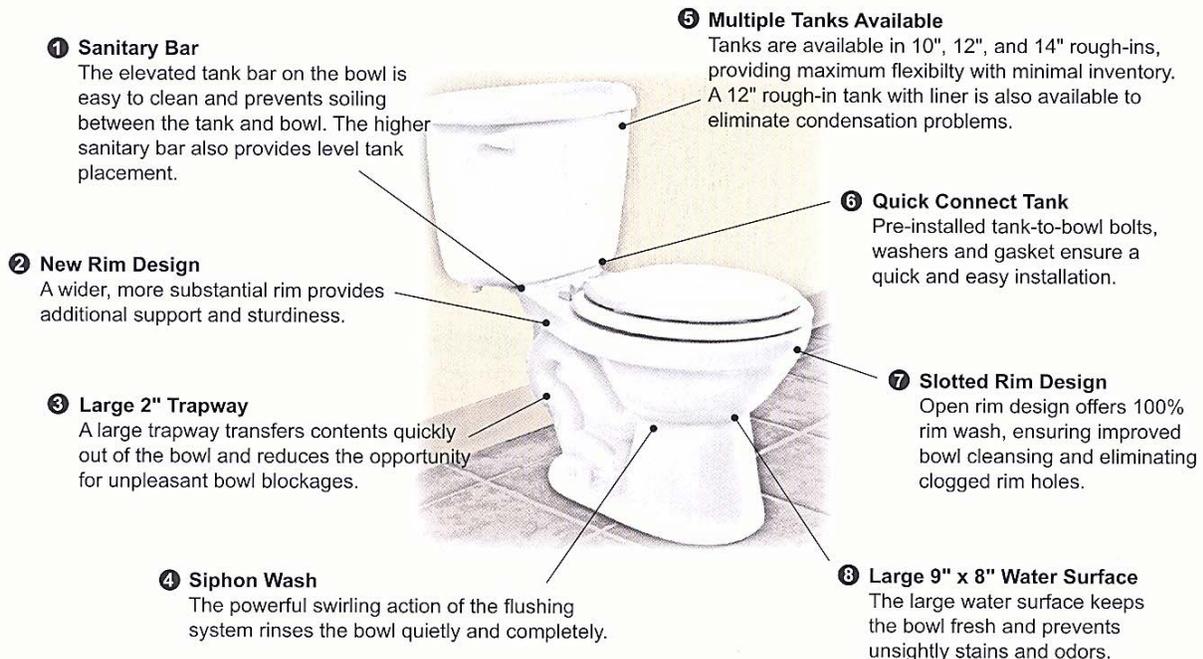

a fresh face on an industry favorite

The NEW Abingdon™ by Briggs® is a fresh face on a long-time industry favorite. The Abingdon has been widely accepted for many years as a superior, competitively priced product. Briggs has enhanced the style and performance to complement the value of this enduring two-piece toilet.

The new Abingdon features a re-engineered bowl with a thick continuous rim and wide tank platform that provides generous tank support. The Abingdon's powerfully cleansing flush is unsurpassed among today's 1.6 gallons per flush gravity fed toilets. The continuous open rim rapidly forces water through the entire bowl, creating a powerful siphonic flushing action for a cleaner, more complete flush.

The Abingdon is an established trade favorite. Now it's even better.

*Think Quality. Think Value. Think Briggs.*

## Features

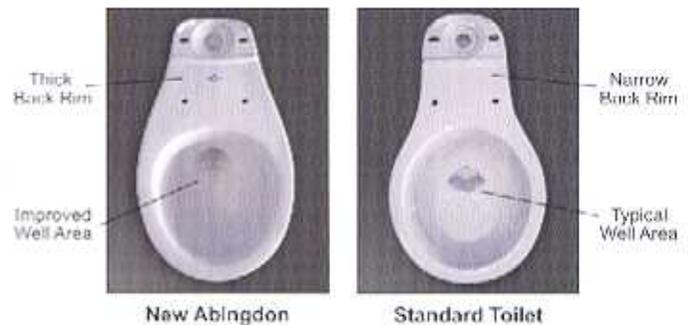

### • Re-engineered Rim

The redesigned front and continuous wide rim adds a solid, substantial feel to the Abingdon.

### • Improved Bowl Design

The Abingdon's new bowl offers a thick back rim and an improved well area that provides a more direct outlet, moving contents swiftly out of the bowl.

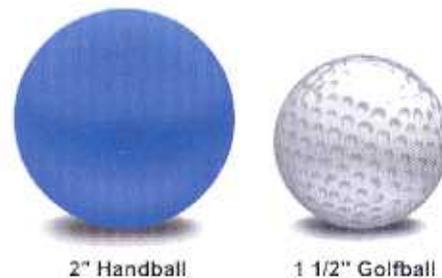

### • Generous 9" x 8" Water Surface

A large 9" x 8" water surface keeps the Abingdon's bowl clean and fresh, and minimizes the potential for unattractive bowl staining.

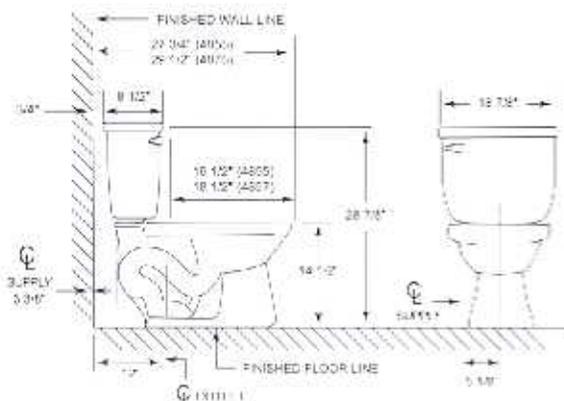

### • Large 2" Trapway

The Abingdon features a large 2" trapway capable of flushing an object the size of a handball. ANSI standards require typical trapways to only pass an object the size of a golfball, approximately 1 1/2".
