Weathered Wood

### Roofing products for the professional.

The American Heritage Series® of laminated fiberglass shingles by TAMKO brings the rustic beauty of wood shakes to any home, with the added security of a U.L. listing for Class A fire resistance. Heritage® shingles have a rich Shadowtone granule blend that creates the elegant, dimensional appearance of wood, without the high cost or safety concerns. The random-cut design eliminates zipper patterns common with other laminated shingles. And our Algae-Relief (AR) limited warranty provides for cleaning of discoloration caused by certain algae growth that may occur in areas with high humidity.

All Heritage shingles feature double layers of durable fiberglass mat for strength. Each layer is coated on both sides with weathering-grade asphalt and topped with ceramic mineral granules for maximum roofing protection. A self-sealing strip of asphalt helps provide added wind resistance. Heritage® 30 AR and Heritage® 50 AR shingles meet ASTM D 3462 at time of manufacture. Each Heritage shingle is backed by a 30- or 50-year limited warranty\*\* for your peace of mind.

#### Classic Heritage Colors

Subdued. Elegant. Enduring. These traditional colors have been beloved by Americans for generations. In shades from muted greys to warm, rustic browns, this classic color collection will bring timeless beauty to your home.

Our most dramatic color palette, these contemporary blends showcase nature's most vibrant hues. Capture the majesty of rugged mountains, the golden brilliance of the harvest, or the changing greys of a summer thunderstorm. These bold shades give your roof a look of natural beauty and distinction.

These symbols shown beside each color name denote warranty length options and availability.
